

## (On-Demand)

## Overview

### Features at a glance

- On-Demand service. Ready to go when you need it
- Pay-as-you-go. No waste, no contracts
- Easy to engage. Call us or sign-up online
- All testing types from exploratory to functional
- Fully managed service with professional testers
- Real world testing with real people, not emulators
- All browsers, all operating systems, all devices

**BCA** *"Cloud Testers was easy to use - Centre4 Testing managed everything for a fixed price and revealed how our application worked in the real-world, across configurations that we couldn't contemplate organising. This is a pay-as-you-go service at a fraction of the cost and logistics of in-house testing."*

**Sean Sullivan, British Car Auctions**  
12m web hits per month, 12,000 vehicle sales per week

**RS** *"With hundreds of thousands of items available online, its critical that our site is not just fully functional but that our customers enjoy a positive user experience when making purchases. Centre4 Testing's on-demand Cloud Testers service is crucial in helping us understand and continually improve those user experiences across a huge number of internet devices and configurations."*

**Gordon Huxtable, RS Components**  
over 300,000 electronic, electrical & industrial components online

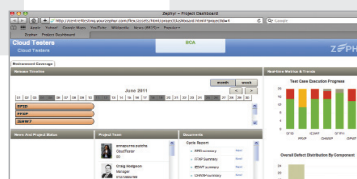

Does your application work across the browsers, operating systems and devices that your customers are using today? What kind of experience are they getting and how does it compare with others in your space? How does it integrate with Social Media?

Cloud Testers is the UK's leading, fully-managed on-demand service using teams of testers based in the cloud to test how your application behaves in the real-world.

### How it works

At the heart of Cloud Testers is our community of 7,000 of the best professional testers in the UK. This is how Cloud Testers works, it's really straightforward:

- 1 Scope:** call us or use our online quotation tool to capture your requirements. Functional, usability, exploratory and load testing can all be included. Our Best Fit feature gives you insight into browser trends and usage, for example.
- 2 Test Management:** we'll assign your Cloud Test Manager, an expert who will guide you through the process and advise you on your scripts or user journeys if you need any help.
- 3 Test Execution:** our Cloud Testers have every combination of device, browser, operating system and carrier network you're likely to want to test. They can also be chosen to represent particular social demographics or have the specialist expertise you need in your market sector. We typically use 6-40 testers per project but Crowd Sourcing for usability could take this to several hundred testers. This truly is testing in the real world!
- 4 Test Reporting:** log-in to your own client dashboard in our cloud-based test management tool and get your results any way you want - you can even watch the defects reported in real-time! Your Cloud Test Manager will be happy to discuss these with you.

Category	Average Rank
Interface, Screen control, scrolling, colouring, fonts etc.	3.92
Layout, Was it clear, contemporary, uncluttered?	3.64
Navigation, Was it located where you'd expect?	4.14

### Next steps

This is on-demand testing at its best, a pay-as-you-go price, simple and fast - call us today and you could have results next week. And if you'd like to use Cloud Testers as part of your regression testing strategy then we can build a test pack of automated scripts, running and maintaining these for you as a managed service.

Contact us for an online, no-obligation demonstration or simply get started with building your service and quotation at [www.centre4testing.com/cloudtesters](http://www.centre4testing.com/cloudtesters). We'll not only make this easy for you, we'll give you confidence every step of the way.
